Respected Madam,

Sub: Feedback on CE 3401- Applied Hydraulic Engineering, II year / IV semester, AY 2022-23 forforthcoming academic year.

It is herewith brought to your kind attention that I handled CE 3401- Applied Hydraulic Engineering, II year / IV semester Civil Engineering 2021-25 batch in the Academic year 2022-23 Even Semester. In this connection, Iaspire to convey my feed back to the forthcoming academic year as follows:

- Applied Hydraulic Engineering is a problematic subject . Hence, I have given more concentration on tutorials in the extra class hours and more new problem solving in apply level which has covered most of the analytical problem.
- I have been conducting Video session at the required point each unit in order to encourage understanding the basic concepts. Moreover, I have discussed the critical topics during this session.
- In order to improve the conceptual understanding of the slow learners, they were identified based on their performance in the internals and special classes were conducted.
- Despite of all the above-mentioned efforts, Course materials, experimental videos, solved answer papers and reference books were provided to the students for effective revision.
- Assignments were assigned regularly to the students, covering various aspects of the subject.

Suggestion to the forthcoming semesters:

- All the tutorials and video sessions have been conducted and their relation with the problem solving skill and understanding the theoretical concepts were explained to the students. For better understanding, Practical demonstration sessions/ workshop will be planned for the students.
- Should encourage students to prepare self learning activities likely NPTEL, Coursera, Udemy, etc.

Thanking you,

Respected Madam,

Sub: Feedback on subject CS3451 – Introduction to Operating Systems
(4th Semester – 2022-23 EVEN) – Reg.

I have handled the theory subject CS3451 – Introduction to Operating Systems for the 2nd year CSE department students in 4th semester during the academic year 2022-23. Herewith I would like to convey my feedback regarding the above said subject as follows:

- Students have understood the basics and functions of operating systems.
- Operating Systems paper is along with lab, it was easy for the students to understand the concepts.
- Students have understood scheduling algorithms and process synchronization.
- Students got Practical knowledge in Process, Memory and Storage Management concept.

Suggestions:

- Guest Lectures from Companies can be arranged to explain the basics of virtual machines and Mobile OS like iOS and Android.
- Need additional hours for Lab program implementation.

Thanking You.

Respected Madam,

Sub: My Feedback on EC3401 Networks and Security, Fourth semester, AY 2022-23 for forthcoming academic year.

- It is herewith brought to your kind attention that I have handled EC3401 Networks and Security, Fourth semester 2021 - 2025 batch in the Academic year 2022-23 Even Semester. In this regard, I wish to convey my feed back to the forthcoming academic year as follows:
- This subject consists of 60% Theory, 20% Algorithms and 20% Problems. Hence, I have shared many video tutorials in connection with the subject as it is laboratory oriented also.
- The subject includes more theory networking concepts so I gave many assignments topics to understand the theory concepts.
- The subject is related to laboratory so most units are related with the practical concepts.

Suggestion to the forthcoming semesters:

- Many networking concepts have been studied from a theoretical perspective, but they have been missed from a practical standpoint. If possible, these methods will be implemented into upcoming semester laboratories to improve student's better understanding.

Sub: My Feedback on ME3451 Thermal Engineering, fourth semester, 2020-24 batch for forthcoming academic year.

I would like to bring to your kind attention that I have been assigned to handle ME-8493 Thermal Engineering-I for the fourth semester, Mechanical Engineering 2020-24 batch. In light of this, I would like to give the following feedback for the upcoming academic year:

- This subject consists of 70% Problems and 30% theories. Hence, I have given equal concentration on problems and theories. Moreover, I have thought the subject through teaching pedagogies whenever and wherever it's essential.
- Since the traditional teaching approach proved ineffective for effective communication, I employed animated videos and real-world examples to clarify the subject's fundamentals.
- At the conclusion of each unit, I have done a question-and-answer session to make sure that the students have understood the concepts. Additionally, I covered the important topics during this time.
- This subject is one of the toughest subjects in the fourth semester, hence I have identified the slow learners and conduct the special classes for them to enhance their subject knowledge.
- I have provided the steam table, Mollier chart and properties tables to each student and trained them to solve the problems.

Suggestion to the forthcoming semesters:

Many thermodynamic processes and related devices have been studied theoretically; also these have been covered practically by the fourth semester itself. Hence, during class hours, bring all the students directly to the laboratories and teach the subjects with the aid of engines and machines to improve students' understanding.

It is here with brought to your kind attention that I have been handled AD3491-Fundamentals of Data Science and Analytics for the fourth semester AD in the Academic year 2022-23 (Even Semester). In this connection, I aspire to convey my feedback for the forthcoming academic year as follows:

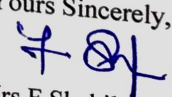

- This course consists of 60% analytical problems and 40% theory. Hence, I have utilised both animated video lecturer and chalk and talk methodology, I have given more concentration on problems and data set of each type of statistical methods meanwhile briefly explain the theory concepts with suitable examples.
- Fourth unit covers the concept of t test for Independent samples and related measures. It is the complicated part of the subject. So that, I explain many examples based on the text book problems.
- Second and third units having z test, z scores and Hypotheses testing in which the students felt more easier to solve the problems. And am also insisted the students complete the analytics course in NPTEL.

Suggestion to the forthcoming semesters:

- Give more problems in each type of statistical methods. Try to complete projects in any of the methods.
